36-50 Weight	150 Patient weight	

Features

Belate armchair, one or two seats, is specially design to be used in hospitals, clinics, nursing homes and also in home care.

Some of its main characteristics are:

- Structure:

It has a resistant pine wood structure with laminated panel, which protects it against impacts.

The armchair has been designed with soft lines and rounded edges, without sharp edges and cutting surfaces to avoid any problem with cuts and scratches.

- Foams:

Inside the armchair has a composition of different foams what's makes it more comfortable to the patient to improve his welfare during his hospital stay.

All the armchair is made by a polyurethane foam base (25 kg/m³), except the seat that is made of a higher density foam (30 kg/m³), which gives more collapsing resistance and guaranteeing an ergonomic posture.

- Upholstery:

The foams are upholstered with latex-free vinyl fabrics, breathable, easy to clean, abrasion resistant, anti-fungus, antibacterial and fireproof M2.

- Backrest:

Ergonomic design backrest with integrated wings. The wingchair helps the user relaxation and to maintain the vertical position to people with stability problems.

80 mm. belts included.

- Seat:

Seat with elastic suspension N.E.A. that allows an optimal distribution of the weight and giving an unlimited durability.

- Legs

Four (4) wooden legs, the front ones with greater height (8 cm), than the ones in the back (6 cm).

Sliders included to allow the armchair move without structure consequences.

without structure consequences.

- Armrest:

Upholstered armrest wide and straight, to encourage the user comfortability and avoiding pressure points on him.

Technical information

Total length	820 mm. ± 10 mm.
Total width with armrest (one place)	690 mm. ± 10 mm.
Total width with armrest (two places)	1220 mm. ± 10 mm.
Total height	1030 mm. ± 10 mm.
Sitting surface height	420 mm.
Sitting surface width (one place)	510 mm.
Sitting surface width (two places)	1020 mm.
Sitting surface depth (one place)	500 mm.
Armchair weight	36 - 50 kg. (según nº plaza)
Maximum patient weight (MPW)	150 kg.
