

730-02 Bedside cabinet

Features

The 730-02 bedside cabinet is specially designed for use in hospitals, clinics, homes and for home care.

Some of its features are:

- Structure:

The front of the bedside cabinet is made of solid beech wood free from stains and knots.

18 mm beech laminate panels edged in 2mm thick PVC.

The structural parts that are in contact with users are rounded to be pleasant to the touch and to prevent harm or injuries when in contact with the bedside cabinet.

Everything is coated in varnish to extend the useful life of the bedside cabinet.

- Legs:

Four (4) legs made of solid beech wood free from stains and knots.

The legs in areas in contact with the ground are finished off by sliders. These pieces allow the bedside cabinet to be moved almost effortlessly during cleaning operations without damaging the structure of the bedside cabinet.

The sliders are made of high strength polymer, but may optionally be made of felt or metal.

- Composition:

The composition of the bedside cabinet offers two possible options. It can have:

Drawer-hollow-cabinet
Drawer-drawer-cabinet.

- Other features:

Upper edge prevents objects from falling.

Drawer opening system by metal guide with safety catch.

Ergonomic metal handles

Doors open fully, 110°.
